Portfolio Project
About Page

Your About page is an opportunity for you to introduce yourself and highlight the connections between your skills, experiences, and knowledge. Make sure your biographical information is relevant and professional. This page can also highlight your overall site objectives and include links to other sections of your portfolio. Answer the questions below to begin identifying potential content for your About page.

1. What biographical information do you want to share with your audience? What is important to communicate with them? Consider discussing your university program, current or emerging interests, and/or future plans. Remember to only include relevant information.

2. Which skills, experiences, and/or knowledge would you like to highlight? How will you guide your audience to other sections of your portfolio?

3. How might you most effectively articular your overall objective or message?
